

Polycom® HD Voice

The Future is Calling

Polycom HD Voice – Over twice the clarity and fidelity for more productive voice communications

Polycom has once again redefined the standard for crystal-clear, natural voice communications with Polycom HD Voice technology. Leveraging over 15 years of leadership in communications technology, Polycom HD Voice is revolutionizing voice communication and collaboration by bringing astounding high-fidelity to the telephone, creating a richer and more natural experience.

Polycom HD Voice delivers over twice the clarity of ordinary phone calls for life-like, vibrant conversations. It's like switching from AM radio to CD-quality audio. The difference is so astounding, you will never want to go back to regular phone calls.

This increased clarity enables much more natural conversations, which significantly boosts recognition and enhances productivity. It's like being in the same room with the other participants on the call. You can hear every word without repeating, which saves time and cuts down on misunderstandings. User satisfaction is also increased by reducing frustration during phone conversations.

As global business and remote collaboration continue to increase, the need for clear communications has become more critical than ever. Accents and cultural differences add to the challenges. The clarity delivered by Polycom HD Voice makes remote collaboration easier than ever, enabling geographically dispersed teams to communicate as effectively over the phone as they can in person.

Polycom HD Voice delivers the next generation of voice quality over the phone by combining the following factors:

Wideband technology for over twice the clarity of ordinary phone calls

Polycom's patented Acoustic Clarity Technology 2, which combines next generation industry-leading full duplex, echo cancellation, and noise reduction with advanced voice processing

Best-in-class system design, bringing all these software components together with hardware design for a total solution that maximizes the overall sound quality

Polycom offers conference phones, desktop IP phones, and PC VoIP products that feature Polycom HD Voice. For more information about these products, or to learn more about Polycom HD Voice or experience a demo, please visit <http://www.polycom.com/hdvoice>.
